

GET INVOLVED!

You can join the growing land trust movement and assist ALTA in achieving our urgent mandate by:

- Making a donation
- Funding an initiative
- Volunteering your time
- Sharing your expertise

There is nothing in which the birds differ more from man than the way in which they can build and yet leave a landscape as it was before.

Charitable Registration No. 85879 9893 RR0001

In ever growing numbers, Albertans are recognizing the value of our unique landscapes and the need to conserve the places we cherish. Landowners have a deep connection to their land and know the gifts that conserved lands provide communities – clean air and water, healthy foods, wildlife habitat and scenic beauty. All too often these special places disappear forever because of development and urban sprawl.

Albertans who want to conserve their land can turn to land trusts – non profit organizations that work with landowners interested in protecting open space.

The Alberta Land Trust Alliance (ALTA) is a registered charity formed in 2006 with a mandate to help conserve and protect Alberta's environmental heritage and landscapes of natural and cultural significance. The organization aims to help maintain biodiversity and ecological integrity of those landscapes for public benefit.

VISION

Alberta's future landscapes are rich in biodiversity and have strong ecological integrity.

MISSION

To represent the land trust community and build capacity in land trusts to conserve diverse and ecologically important landscapes in Alberta.

HISTORY

In 2006, Alberta Environment brought together Alberta's land trust community to explore ways to enhance the use and delivery of conservation easements in the province. At that time, Alberta Environment was responsible for conservation easement legislation and recognized that land trusts played an important role in securing conservation easements on private land. Attendees identified a number of priority issues including a recommendation for coordination among Alberta's land trusts. In response to this, Alberta Environment announced \$300,000 in provincial funding and secondment of

There are *more than 1500 conservation easements* in Alberta, representing *more than 115,000 acres*. About 50 per cent of these conservation easements were completed by land trusts.

Source - Public and Private Contributions to Conservation, Environment Canada, 2009

There are *more than 1000 conserved properties* in our province, representing *more than 150,000 acres*, which are owned by land trusts and others.

a staff person over three years for the creation and facilitation of the Alberta Land Trust Alliance (ALTA).

Now in its fourth year of operation, ALTA has recently received charitable status, and as such, is reaching out to a wider range of potential stakeholders. Operating costs remain very low, thanks to the generous in-kind contribution of office space by the Alberta Water Council. The organization is well positioned to make great strides in facilitating future land conservation in Alberta.

With increased awareness of land trusts and more education on the value of conservation, there will be increased donations of land – the best legacy gift to the environment sector and to all Albertans.

OUR PRIORITIES

The land trust movement has an urgent mandate to secure lands for conservation given the pressures of development, urban sprawl, climate change, intergenerational land transfer and biodiversity.

ALTA does not intend to own or hold conservation lands or conservation easements but will provide service and support to those that undertake these activities. ALTA will continue to serve as a resource to government as policies are developed and will become a trusted source of information for industry, agriculture and community stakeholders.

Outcomes of major actions that ALTA will be undertaking in the next 36 months include:

- Increasing public awareness of the value of land conservation and land stewardship;
- Advancing environmentally sound stewardship

among landowners and increasing their understanding of environmental issues pertaining to specific areas of land in Alberta;

- Educating potential stakeholders about the role that local land trusts can play in preserving land in perpetuity;
- Fostering relationships and building linkages within the land trust community in order to advance the work of local land trusts;
- Working with all levels of government to influence positive land conservation policies;
- Increasing the number of acres of conserved lands in Alberta by building capacity in local land trusts;
- Identifying where gaps may exist in specific areas of the province and assisting with the formation of new land trusts at the grassroots level.
- Speaking as a unified voice on behalf of our member organizations.

Land trusts help **preserve land** for future generations, protect our food and water supply, provide wildlife habitat, and **strengthen communities**.

More than **one third** of Alberta's land is privately owned and managed. Alberta's landowners are faced with competing land pressures and many are seeking ways to **conserve their lands** through personal action. Alberta's land trusts work directly with these private landowners and **build partnerships** for responsible stewardship of private lands.

"We would like to know how our land can be kept in its natural state so that future generations of Albertans can enjoy it, and we look to the Alliance to give us information in this respect."

Anne and John Packer, Landowners - Bruderheim, Alberta

ALTA MEMBERS

ALTA Members adhere to a national set of standards and practices regarding the broad spectrum of land trust activities. The organization serves 17 member organizations including 11 land trusts.

Member Land Trusts

Alberta Conservation Association
Alberta Fish & Game Association
Crooked Creek Conservancy Society of Athabasca
Ducks Unlimited Canada
Edmonton & Area Land Trust
Foothills Land Trust
Land Stewardship Centre of Canada
Nature Conservancy of Canada
Southern Alberta Land Trust Society
Western Sky Land Trust
Wild Elk Federation

Other Member Stakeholders

Alberta Environmental Law Centre
Beaver Hills Initiative
City of Edmonton
Miistakis Institute for the Rockies
Rockyview County
Special Areas Board

ALTA also encourages involvement by individuals, businesses and government agencies as associate members.

What is a land trust?

A land trust is a non profit organization that actively works to conserve land by undertaking or assisting in land or conservation easement acquisition, or by its stewardship of such land or easements. Land trusts (sometimes called land conservancies) have existed in North America since 1891. However, it is only in the last two decades that the land trust movement has really taken hold as one of the fastest growing and most successful conservation movements in our history.

Land trusts conserve all different types of land. Some protect only farmland or ranchland, while others conserve forests, mountains, prairies, deserts, wildlife habitat, cultural and heritage resources such as archaeological sites or battlefields, urban natural areas, scenic corridors, wetlands or waterways. It is up to each organization to decide what type of land to protect according to its mission. Some parcels protected by land trusts have no, or extremely limited public access, for the protection of sensitive wildlife, or to allow recovery of damaged ecosystems. Many protected areas remain under private ownership, which limits access as well. However, in many cases, land trusts work to eventually open up the land in a

limited way to the public for recreation in the form of hunting, hiking, camping, wildlife observation, or other responsible recreation activities. Some land may also be used for sustainable agriculture, ranching or logging.

How is land conserved by land trusts?

Land trusts have many options available to conserve land. The most common options are the acquisition of fee simple interests in land and of conservation easements.

Land trusts help your community:

- By helping individuals protect community resources that come from the land – water, food security, wildlife, and places for recreation and reflection;
- Promoting stronger local communities by giving citizens the knowledge and support they need to reach out and work with their neighbours to protect the local places they need and love;
- Serving as a part of a national community of land trust staff, volunteers, members and advocates committed to private land conservation across Canada.

ALTA will work to bring government, industry and private landowners together to ensure *intergenerational responsibility* is a key consideration in all forms of human land use.

Ultimately, ALTA will build capacity in local land trusts to enable these organizations to conserve more land. Through our efforts, communities will learn more about conservation and ways to protect private land. Once better informed, landowners can consider their own personal options and how their decisions will impact Alberta's natural areas. Individual and collaborative action will result in more acres of conserved lands - reducing biodiversity loss, promoting rangeland health, protecting wildlife and plants, and protecting and improving the habitat where they live.

“If we want our children to enjoy the same quality of life that current generations have, we need a new land-use system... Clean water and air, healthy habitat and riparian areas, abundant wild species and fisheries are all ‘public goods’ that Albertans enjoy and value.”

Land-use Framework, Government of Alberta

BENEFITS OF CONSERVING LAND

Saving Limited Resources

Our air and water are limited resources. The tree canopy and vegetation serve as critical filters for our air. Wetlands that border our rivers, lakes and streams filter pollution before it reaches our drinking water. If we do not remove the pollutants that our society puts into the air and water, we consume them ourselves.

Boosting Our Economy

In addition to health and food benefits, conserving land increases property values near greenbelts, saves tax dollars by encouraging more efficient development, and reduces the need for expensive water filtration facilities. Study after study has demonstrated the tremendous economic benefits of land conservation:

A Return on Investment: The Economic Value of Colorado's Conservation Easements, 2008, http://www.tpl.org/content_documents/Final%20report%20ecosystem%20services.pdf

Report – Managing Growth in New Hampshire, 2005, http://www.tpl.org/content_documents/nh_growthExecutiveSummary.pdf

ALTA is positioned in the community to work across political boundaries, assisting local land trusts and *empowering landowners* to take responsible action.
